

- positioning for deeply indented dtds (ie not in iv\_mainPane)
  - I noticed one oddity when using the +/-: I added 2 list items to listfragment and i only filled in linktitle and description. i checked it in, then checked it back out. now when i add more list items using +/-, it only adds linktitle and description, not the 4 fields that should be there. do you know what might be going on? i can show you on Monday if this description is cryptic...
  - checkoutForView (like checkout without lock)
    - implement checkoutForView which is a GET without lock token
    - flag on fragment, iv\_readOnly = false;
    - from either active list or search can do a getForView
    - put into edit window (right side) without being able to modify
    - disable the checkin button for read only fragments
    - title bar include READ only "-- Read only --"
    - [weird cases:
      - [1 viewing fragment, now want to check it out, can't easily do it]
      - [2 if viewing fragment, then search and do a checkout, it will just go to existing fragment, which is still in read mode]
      - [3 test... with new icons]]
  - Logout... prompt to unlock all checked out fragments or keep for editing
    - choose which to save locally
    - offline editing: dtd, save xml file, multimedia file, locktoken
    - on login fill in right side with locally saved fragments
    - 1. unlock unwanted fragments.
    - 2. save dtd & xml & multimedia files
  - offline editing without checking into server. use local dtds.
  - stale sessionID put up dialog for every SC\_UNAUTHORIZED
  - show media file for browseLocal (eg, image) on browseLocal entry
  - publish info has 3 children: stylesheet is not properly indented
  - copy and create
  - search nresults print, results in message pane
  - captitalize font (and smaller) for table headings...
  - (tag1 | tag2)\* method hasQualifier doesnt find model with () groupings
  - chuck button for audio fragment, checkOutForView
  - change login init file name ie "franklin\_init.xml" -> "/login" ...  
synch with jeff
